

SCIENCE & SEL DETECTIVES! HERE'S YOUR ASSIGNMENT FOR THE WEEK...

CLUES FOR WHEN SOMEONE ELSE IS FLIPPED

Detectives, last week we reminded ourselves about clues for what it looks like and feels like when our lids get FLIPPED! Since we are spending so much time indoors with family members right now, detectives should also be on the lookout for when the people around us are FLIPPED.

We look for the same clues we notice for ourselves:

- Their body gets tight
- They may start to shout
- They seem frustrated or angry
- They do not seem like their best self

We know lots of strategies to help US when we get flipped. Can you be the teacher and teach your family your favorite breathing strategy this week? Tell them they can practice this strategy if they feel flipped!

Draw with Mo Willems author of Elephant and Piggy!

Detectives love reading Elephant and Piggy books! Now you can draw some of your favorite characters by following along with the author, Mo Willems. Grab a piece of paper and a pencil, and have your parents help you by following this link:

<u>https://www.youtube.com/playlist?list=PL14hRqd0PELGbKihHuT qx_pbvCLqGbOkF&fbclid=IwAR1b1pc_WnGpJwO4q6tmzZwwwLdMyTZd_MDEgcMacqYKaSl0akf4vbNzro</u>

Send your teacher your doodle! We would love to see what character you recreated.

SCIENCE

Scavenger Hunt!

Detectives investigate their environment.

This week your science assignment is to go on 5 different Scavenger Hunts. Please investigate with your eyes, hands and most importantly your mind.

Attached, you will find a scavenger hunt for each day of the week. For each day, there are a list of items you will try to find using your best detective skills to search for clues.

Write and draw pictures about what you find.

Wash your hands before and after each investigation! And make sure not put anything in your mouth.
