Dear students and families,

Happy spring! I love spring because it means that flowers are starting to bloom, the birds are signing, and I can start to work on gardening! This week I have been making lots of treats for my family and starting to work in my garden.

So, our theme this week is...spring! Look for all the ways that literacy, math, science, art, and SEL tie into the topic of spring. I wonder what seasonal changes you notice happening around your home and community?

I hope you enjoyed the first week of resources we posted on the In-Home Learning page. I am excited to tell you that moving forward, the kindergarten teachers will be sharing favorite read alouds, activities, and routines on our YouTube channel!

Please check them out and feel free to e-mail or ClassDojo message me with pictures of yourself engaging with the activities we post.

Take care,

Mrs. Osgood
